

Academic Word List – Word Formation

Lesson Plan

Aim: to develop the students' awareness and lexical repertoire of the Academic Word List.

1. Preparation

- Photocopy the word form sheet with the contextualised sentences on the back.
- Photocopy a copy of the AWL:
<https://academic-englishuk.com/wp-content/uploads/2017/03/AWL-copy.pdf>
- **Disclaimer: only the most frequent words in the sublists are used in the word forms and not every form is shown.**

2. Set up

- Give out and explain the rationale behind the Academic Word list sheet (if necessary). *The Academic Word List (AWL) contains 570 word families which were selected because they appear with great frequency in a broad range of academic texts. The list helps identify academic vocabulary and formality.*
- Give an example of word formation 'analyse' – ask the students to write down the other forms of this word.

noun	verb	adjective	adverb
	analyse		
Analysis / analyst		analytical	analytically

3. Academic Word Forms Sheet

- Show the students possible online dictionaries to use to help find the answers.
- Longman Dictionary: <https://www.ldoceonline.com/>
- Cambridge Dictionary: <https://dictionary.cambridge.org/dictionary/english/>

4. Contextualised Sentence Sheet

- Only use the words from Academic Word Forms sheet
- Only use the same word once.
- **Disclaimer: there are many possible answers for this activity.**

5. Feedback

- Give out / email Academic Word Forms sheet with answers.
- Go through the Contextualised Sentences Sheet as a class to check the variety of possible answers.

6. Production

- Use the AWL Kinesthetic Lesson (cut up words) to consolidate understanding.
- <https://www.academic-englishuk.com/vocabulary>
